INFORMATION FOR YOUR SAFETY!

THE FCC REGULATION WARNING (for USA)

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Unauthorized changes or modification to this system can void the user's authority to operate this equipment.

CAUTION

The normal function of the product may be disturbed by Strong Electro Magnetic Interference. If so, simply reset the product to resume normal operation by following the owner's manual. In case the function could not resume, please use the product in other location.

PRECAUTIONS

PLEASE READ CAREFULLY BEFORE PROCEEDING

Please keep this manual in a safe place for future reference.

Power Supply

Please connect the designated DC adaptor to an AC outlet of the correct voltage.

Do not connect it to an AC outlet of voltage other than that for which your instrument is intended.

Unplug the DC power adaptor when not using the instrument, or during electrical storms.

Connections

Before connecting the instrument to other devices, turn off the power to all units. This will help prevent malfunction and / or damage to other devices.

Location

Do not expose the instrument to the following conditions to avoid deformation, discoloration, or more serious damage:

- Direct sunlight
- Extreme temperature or humidity
- Excessive dusty or dirty location
- Strong vibrations or shocks
- Close to magnetic fields

Interference with other electrical devices

Radios and televisions placed nearby may experience reception interference. Operate this unit at a suitable distance from radios and televisions.

Cleaning

Clean only with a soft, dry cloth.

Do not use paint thinners, solvents, cleaning fluids, or chemical-impregnated wiping cloths.

Handling

Do not apply excessive force to the switches or controls.

Do not let paper, metallic, or other objects into the instrument. If this happens, remove the electric plug from the outlet. Then have the instrument inspected by qualified service personnel.

Disconnect all cables before moving the instrument.

Quick Start

Turning the Power On or Off

Press the [POWER] button to turn on the power. The LCD will be lit. Press this button again to turn off the power.

0

Notes:

- 1. You can power the instrument either by using the included power adapter or by using batteries. If you're using batteries, open the battery compartment cover on the bottom of the instrument, insert the batteries, then replace the compartment cover firmly. Do not mix used and new batteries. Remove the batteries from the instrument when it is not in use.
- In order to save energy, the instrument will automatically shut down after 30 minutes of not being used. You can change this setting in the function menu.

Rotate the [MASTER VOLUME] knob clockwise to increase the master volume or counter-clockwise to decrease it.

Playing Demo

Press the [DEMO] button to enter Demo mode. It will start playing all demos in a continuous loop. The LCD shows the current demo name and number. Use the data dial or [<] / [>] buttons to select a demo. To stop demo playback and exit, press the [START/STOP] or the [DEMO] button.

Playing Sound

- Press the [SOUND] button to enter Sound mode. The "R1" indicator lights up. The LCD shows the current Sound name and number.
- 2. Use the data dial or [<] / [>] buttons to select a Sound. Or use the numeric buttons to enter a preset Sound number.
- 3. Play the keyboard to use this Sound for performance.

Layer Mode

- Press the [LAYER] button to enter Layer mode. The "R2" indicator lights up. The LCD shows the current layer sound name and number.
- **2.** Use the data dial or [<] / [>] buttons to select a layer sound. Or use the numeric buttons to enter a preset sound number.
- **3.** Play the keyboard. You will hear two different sounds playing together.
- 4. In Layer mode, press the [LAYER] button to exit this mode.

Split Mode

 Press the [SPLIT] button to enter Split mode. The "L" indicator lights up. The LCD shows the current split sound name and number.

The default split point is F#3 (19). You can change the split point in the function menu.

- **2.** Use the data dial or [<] / [>] buttons to select a split sound. Or use the numeric buttons to enter a preset sound number.
- **3.** Play the keyboard. You will hear different sounds from the left and right hand sections.
- 4. In Split mode, press the [SPLIT] button to exit this mode.

Note:

When layer and split sounds are in use, only the right hand area plays the layered sound. Use the mixer to adjust the volume of each part.

Sustain

Press the [SUSTAIN] button to turn panel sustain on or off. Or connect a sustain pedal to this instrument and use the pedal to produce a smoother sustain.

Pitch Bend

When you're playing the keyboard, roll the pitch bend wheel upward or downward to apply pitch-bending effect to the notes.

Piano Mode

Press the [PIANO] button to enter or exit Piano Mode. In Piano Mode, all parameters become optimized for concert piano performance. You can start style playback, but it plays the rhythm track only.

Notes:

- When enter Piano Mode, the Fingered function will be automatically turned off.
- 2. In Piano Mode, the Layer and Split functions will not be available.

Twinova

Twinova function splits the keyboard into two areas with the same sound and octave range, for the convenience of playing together with a friend or instructor.

- Press [SPLIT] and [LAYER] buttons at the same time to turn Twinova on or off. The default split point is E4 and F4.
- 2. Changing the Twinova octave. Press the [FUNCTION] button to enter the function menu. Use the data dial to select "TwinoOct", then use [<] / [>] buttons to change the octave setting. Pressing [<] and [>] buttons at the same time will reset to the default octave setting.

FUNCTION

Notes:

The Twinova mode and the split / layer functions cannot be used at the same time.

DSP Effect

DSP is turned on by default. The "DSP" indicator lights up on LCD. To change the DSP setting, press the [FUNCTION] button to enter the function menu. Then use the data dial to select "DSP". The LCD will temporarily show "DSP ON". Use the [<] / [>] buttons to turn the DSP on or off. Pressing [<] and [>] buttons at the same time will reset to the default setting.

Note:

There may be a slight pause in the sound if you switch the DSP effect on/off while style or song is playing.

Using Sampler

You can record sounds by using the built-in microphone located above the LCD and then play the keyboard to use them. The sounds will be stored at the end of sound library. Each sample can be recorded up to 2 seconds.

Recording User Sample

 Press [MIX] and [RECORD] buttons simultaneously to enter Sampler mode.

Now, it's "Standby" state, the LCD displays "Standby" and the center LED light flashes.

- 2. Use the data dial to select a slot to save the sample.
- 3. After selecting the slot, the sampler will be triggered by the sound directly. When the sampler is triggered, the LCD will show "Sampling". When samlping is finished, the LCD will show "Finished". When the sound volume reaches the trigger level, sampling will start automatically.

When the sound volume drops under the trigger level or when the recording time reaches 2 seconds, it will stop automatically and save the sound.

4. The pitch correction function is turned on by default. The sampled pitch will be automatically recognized and corrected to the closest key pitch. When it is turned off, the sampled pitch will be corrected and set as C4. You can turn this function on or off in the function menu.

Note:

The next available empty slot will be selected automatically before the next sampling starts. For example, if the first slot has data, the second slot will be automatically selected. If all slots are used up, the first slot will be selected. Please note that when sampling again on the slot with data, the original data will be overwritten.

Playing User Sample

- After sampling, it will go back to normal mode automatically. LCD will display the sample you've just recorded.
- 2. Play the keyboard to use this sample for performance.
- You can switch the user sample by using the numeric buttons, [<] / [>] buttons or the data dial.
- You can play the sample with effects when Touch Pad effect is in use.

Deleting User Sample

Hold down [<] and [>] buttons, then turn on the power. All user data will be deleted.

Performance Enhancement

Arpeggiator

Press the [SUSTAIN] and [HARMONY] buttons at the same time to turn on the arpeggiator. The "ARP." indicator lights up on LCD. Repeat this operation to turn off the arpeggiator.

Arpeggiator split point

When the arpeggiator is in use, the keyboard will be split into two sections. Play chords in the left hand section, and play melody in the right hand section. The default split point is F#3 (19) (same as the split point in Split mode). You can change the split point in the function menu.

Harmony

Press the [HARMONY] button to turn this function on or off. When harmony is in use, the "HARMONY" indicator will light up on LCD. Turn on the Fingered function, then play a chord in the chord section. When you play in the right hand section, it will add harmony effect to the notes.

Chord Mode

Entering Chord Mode

Press the [CHORD MODE] button to enter Chord mode. Press the [CHORD MODE] button repeatedly to circulate between "FINGERED -> FULL RANG" → OFF".

In FINGERED mode, the keyboard is divided into two sections. The chord section is in the left hand area. You can play Single Finger and Multi Finger chords in the chord section.

In Full Range mode, the entire keyboard is chord section. Only Multi Finger chords will be detected in the chord section.

Playing in Chord Mode

- 1. Press the [SYNC START] button to engage the sync start function.
- 2. Play a chord in the chord section, it will start playing auto accompaniment of all tracks. Or press the [START/STOP] button to start percussion playback, then play a chord in the chord section to start playing all tracks.

Chord Basics

A chord, in music, is a harmonic set of three or more notes that are heard simultaneously. The most common type of chord is a triad. A triad is a set of three notes that can be stacked in thirds. When arranged this way, the triad's notes, from lowest pitched to highest, are called: the Root, the Third, and the Fifth.

Triad Type

The basic triad types are as follows:

Major Triad	A root with a major third added above and a perfect fifth
	constitutes a "Major Triad".
Minor Triad	A root with a minor third added above and a perfect fifth
	constitutes a "Minor Triad".
Augmented	A root with a major third added above and an augment-
Triad	ed fifth constitutes an "Augmented Triad".
Diminished	A root with a minor third added above and a diminished
Triad	fifth constitutes a "Diminished Triad".

Chord Inversion

When a chord's root is not the lowest note in the triad, it is called an inversion chord. When the root note is the lowest note, it is called a root-position chord. If we put the Third and Fifth in the root position, it forms an "Inversion", so it is called an "Inverted Chord". A major triad and its inversion are illustrated on the right.

Chord Name

The chord name consists of two parts: Chord root and Chord type.

Playing Style

Single Finger

Single-finger makes it easy to produce major, seventh, minor and minor seventh chords by pressing a minimum number of keys on the auto accompaniment section.

Multi-finger

Multi-finger allows you to play chords in normal fingering. Try playing the 32 types of C chords listed on the right.

Full Range

In Full Range mode, it detects chords played in normal fingering (Multi-finger) over the entire keyboard range.

MIDI Recording

In MIDI recording, you can save your recording as a user song on the instrument, or export it to a connected SD card. The saved user songs will not be lost when you turn off the power.

Prepare and Start Recording

- Press the [RECORD] button to enter the user song menu. The LCD shows the current user song number, such as "001 RecSong". If there's no user song, the LCD will show "No File!". Use the data dial or [<] / [>] buttons to select a user song to save your recording.
- Press the [RECORD] button again to engage the recorder. The "REC" indicator will light up. The beats on LCD start blinking. Now you can select the desired sound, style, tempo etc.
- 3. Press the [START/STOP] button or simply play the keyboard to start recording. Alternatively, turn on the Fingered function. Recording will start when you play a chord in the chord section.

Stop Recording

During recording, press the [RECORD] button. It will stop recording and save the recorded song automatically.

If the storage become used up during recording, recording will stop and be saved automatically.

If you are recording with accompaniment, recording will stop when the ending section is finished.

Note:

If the selected user song has data, the previous data will be overwritten by new recording.

Play back Recording

- After recording, the recorded song will be automatically selected.
 Or press [SONG] to enter the Song interface, then use data dial or [<] / [>] buttons to select a user song.
- 2. Press the [START/STOP] button to start the playback.

Delete Recording

Hold down the [RECORD] and [SONG] buttons at the same time, then turn on the power. This operation will delete all user songs.

Alternatively, hold down the [<] and [>] buttons at the same time, then turn on the power. This operation will delete all user data on the instrument.

Audio Recording

In audio recording, you can save your recording as a WAV file to the connected SD card.

1. Connect an SD card to the SD card port on the instrument. The SD card indicator will light up on the LCD when it is recognized. This instrument will automatically engage audio recording, and will save the recorded song to the root directory of the connected SD card. Now you can select the desired panel settings and be prepared for the recording.

Recording

- 2. Press the [RECORD] button to start recording. The LCD will temporarily show "RECSTART". This button LED and the "AUDIO REC" indicator will light up. All the sounds that you hear from the instrument will be recorded, such as accompaniment, keyboard sounds, song playback, demo playback, music from Aux In, vocal singing from the connected microphone etc.
- 3. To stop recording, press the [RECORD] button. The button LED and "AUDIOREC" indicator will turn off. The recorded song will be saved to the "Song" folder in the SD card, and be named as "Audio xxx.wav". Then the LCD will automatically show the name of the recorded song.
- 4. Press the [START/STOP] button to play back this recorded song. Alternatively, you can select to play back the recorded song from the SD card play menu. See Connecting an SD Card for details.

ADDORGE TEMPO 1 15 MEMORY 6 1

Note:

Do not remove the SD card or turn off the power when song saving is in progress, otherwise, it may cause damage to the audio files and the SD card.

Connecting an SD Card

The instrument recognizes SD cards in FAT32 format. It does not support multi-partitioned SD cards. We recommend formatting the SD card on the instrument before using. Do not edit the backup files saved on the SD card from the instrument.

Note:

An SD card in FAT32 format supports up to 512 files under its root directory. Exceeding this limit will make it unable to save or record to the SD cards.

Basic Operations

- When the connected SD card is successfully recognized, the SD card indicator will light up on LCD. Now press the [SD CARD] button to enter the play menu.
 - If the connected SD card is not yet recognized, the LCD will show "WAIT...!". If the SD card recognition fails, the LCD will show "DiskErr!". If no SD card is inserted, the LCD will show "NoDisk!", then return to the previous screen.
- 2. When it's in the play menu, you can use the data dial to select the other menus: "Save", "Load" and "Format". Then, press [>] to proceed or press [<] to go back.
- **3.** When playing back a MIDI file, you can adjust the playback volume by editing this parameter "MusicVol" in the mixer menu.
- 4. Press the [SD CARD] / [SONG] / [STYLE] buttons to exit this mode.

Playing Back Files Saved on SD Card

- 1. Press the [SD CARD] button to enter SD card mode, then use the data dial to select "Play".
- 2. Press the [>] button, and it will show all the MIDI and WAV files under the root directory of the SD card.
- 3. Use the data dial to select a file.
- 4. Press the [START/STOP] button to start or stop the playback.

Note:

This function supports playing back MIDI and WAV files only.

Loading Files from the SD Card

- 1. Press the [SD CARD] button to enter SD card mode, then use the data dial to select "Load".
- Press the [>] button, and it will show all the MIDI files under the root directory of the SD card.
- 3. Use the data dial to select a file and press [>] button to confirm. Now, the instrument's LCD will show a user song name "xxxx RecSong" or "xxxx No Flile!".
- 4. Use the data dial to select a user song slot, then press [>] button to execute loading.

Notes:

- 1. If the selected user song slot is blank, when the loading process is finished, the LCD will show this user song name.
- 2. If the selected user song slot has data (occupied), the LCD will prompt "Sure?", indicating this loading operation will overwrite the existing data. Now you can press [>] button to execute loading. The data that has been overwritten cannot be recovered. Or you can press [<] to cancel loading.</p>

Saving Files to the SD Card

- Press the [SD CARD] button to enter SD card mode, then use the data dial to select "Save".
- 2. Press the [>] button, and it will save all the user songs from the instrument to the SD card in this name "UserSong00X_NUB.mid". If the user song has no data, the LCD will prompt "No File!".
- 3. When the saving process is finished, the LCD will temporarily show "save ok!", then return to show the root directory of the SD card. Description of the File Name "UserSong00X_NUB.mid" "UserSong00X" is the user song name and number, corresponding to the user songs on the instrument.

"NUB" is the file number of the saved song (001~512).

Formatting the SD Card

- Press the [SD CARD] button to enter SD card mode, then use the data dial to select "Format".
- 2. Press the [>] button, and the LCD will prompt "Sure?" indicating it will format this SD card.
- 3. Press the [>] button again to confirm formatting, or press [>] to cancel formatting.

Note:

This operation will delete all data on the SD card. This data cannot be recovered after formatting. Do not remove the SD card or turn off the power during the formatting progress, otherwise, it may cause damage to the SD card.

Performance Memory

Note: Hold down both the [STORE] and [M1] buttons, then turn on the power. This operation will reset the performance memory to factory default setting.

To Register the Panel Settings

Hold down the [STORE] button, then press one of the [M1] - [M4] buttons to save the current panel settings to that memory.

Note: This operation will overwrite the previous data.

To Recall a Panel Setting

Press one of the [M1] - [M4] buttons. It will recall the settings saved in that memory. This will reset the related parameters on the control panel.

Note: Performance memory cannot be recalled when Q.S. function is in use.

To Select a Memory Bank

- 1. Press the [BANK] button. The LCD shows the current bank number.
- 2. Press this button repeatedly to select a desired bank number.

DSP

- 1. Press the [MIXER] button to enter the mixer menu. The instrument will automatically show the mixer parameters that are available for the current mode. For example, when in Song mode, if you enter the mixer menu, it will smartly show "MusicVol" on top of the menu.
- 2. Use the data dial to select the parameters in the mixer menu.
- 3. Use the [<] / [>] buttons to change the volume setting of the selected parameter.
- 4. Pressing [<] and [>] buttons at the same time will reset to the default volume setting. If the current volume setting is the same as the default setting, pressing the [<] and [>] buttons will mute/unmute the selected parameter.

Factory Reset

Hold down the [<] and [>] buttons at the same time, then turn on the power. It will reset to factory default settings, and delete all user data on the instrument, including user songs, user memory and user sounds. The LCD will show "Loading!". When factory reset is completed, the instrument will start normally.

Troubleshooting

Problem	Possible Cause and Solution
The speakers produce a pop sound whenever the power is turned on or off.	This is normal and is no cause for alarm.
Speakers do not produce sound when the keyboard is played.	Check if the master volume is set too low. Check if the R1/R2/L sound volume is set too low in the mixer menu. Check if headphones are plugged into the PHONES jack.
The speakers produce noise when a mobile phone is put near them.	Using a mobile phone in close proximity to the instrument may produce interference. To prevent this, turn off the mobile phone or use it farther away from the instrument.
The auto accompaniment does not play back even when Sync is in standby and a key is pressed.	You may be playing keys in the right hand range of the keyboard. To start the accompaniment with Sync Start, make sure to play keys in the left-hand range.
Certain notes seem to be in the wrong pitch.	Make sure that the tune value is set to 0. Press and hold the [<] and [>] buttons and turn on the power to restore factory settings.
When connecting to computer, the instrument cannot be recognized.	Check if the USB cable is firmly connected. Try connecting another USB port on the computer. This instrument is plug and play and should work without installing a driver.
The pedal does not respond.	Check if the pedal cable is firmly connected.
It cannot read/save to the SD card.	Make sure your SD card is in FAT32 format and not multi-partitioned.
It shuts down after a period of time.	The auto power off function will turn off the instrument after a preset period of time when the instrument is not in use. You can adjust the auto-off function in the function menu.
The Harmony function does not work.	Harmony function is not available when Sound R1 is a drum kit.
