

MUSIC KEYBOARD OWNER'S MANUAL

Important Messages

Please read this page carefully before operating and keep this manual properly for convenient reference in the future.

THE FCC REGULATION WARNING (for USA)

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Unauthorized changes or modification to this system can void the user's authority to operate this equipment.

CAUTION

The normal function of this product may be subject to strong electromagnetic interference. Should the circumstances arise, please follow the relevant instructions in this manual to restore the product to its default settings. Otherwise, try moving the product to another location.

PACKING LIST

Dear customer, please double-check the following items upon receiving the package:

- This instrument
- 12V power adapter
- Assembly kit
- Owner's manual
- Warranty

Power supply

Please connect the power adapter provided in the package to a power socket with the correct voltage. DO NOT connect to power sources with unmatched voltages. Unplug this device during thunderstorms or when the device is not in active use.

Connections

Power off all devices before making connections. This will effectively prevent potential malfunctioning & damage.

Precautions

To avoid deformation, discoloration or other more serious damages, DO NOT place this instrument in:

- direct sunlight
- extremely hot environments or too close to a heat source (such as a heater)
- severe cold such as snowy and icy outdoors
- dusty environments, or places with high temperatures, high humidity, or unstable locations where strong vibrations or displacements may occur
- proximity of strong electromagnetic fields

Interference

To avoid unwanted interference, please keep this instrument at a proper distance from televisions, radios, and cell phones.

Maintenance

Use only soft, dry cloth for cleaning. DO NOT use thinners, solvents, detergents, or wipes soaked with chemicals. DO NOT apply excessive force when handling switches & knobs.

This instrument is safe for use in tropical climates with a maximum operating temperature of 45°C.

The maximum operating altitude is determined by the selected model of the power adapter.

Handling

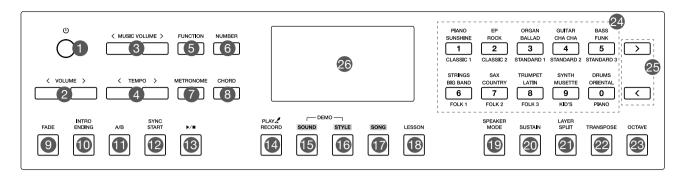

Please avoid getting scraps of paper, metal, or other materials inside this instrument. If this happens, unplug this unit and have it checked by a qualified maintenance personnel.

Also, unplug this unit before moving it to another location.

Control Panel

1. [POWER] Button:

Turn the instrument on or off.

2. [VOLUME </>] Buttons:

Adjust the main (overall) volume of the instrument.

3. [MUSIC VOLUME </>] Buttons:

Adjust the volume of all music content, including styles, songs, and the metronome.

4. [TEMPO </>] Buttons:

Adjust the current tempo (speed) of styles, songs, and the metronome.

5. [FUNCTION] Button:

Hold this button and press specified keys to access the corresponding function settings. Please refer to the Function Settings section for details.

6. [NUMBER] Button:

Hold this button to use [CONTENT SELECT] buttons as numeric inputs.

7. [METRONOME] Button:

Turn the metronome on or off.

8. [CHORD] Button:

Turn the Chord mode on or off.

9. [FADE] Button:

Fade-in before starting style accompaniment or fade-out during style accompaniment.

10. [INTRO/ENDING] Button:

Play the Intro or Ending section of accompaniment.

11. [A/B] Button:

Switch between the Main A and B sections and insert Fill(s).

12. [SYNC START] Button:

Turn the Sync Start function on or off.

13. [▶/■] Button:

Start or stop playing style, song, or lesson.

14. [RECORD] Button:

Turn the recording function on or off.

[PLAY] Button:

Hold to play back the recorded content.

15. [SOUND] Button:

Press to switch to Sound mode or toggle between active sound parts.

16. [STYLE] Button:

Switch to Style mode.

15&16. [DEMO]:

Press the [SOUND] and [STYLE] buttons simultaneously to enter Demo mode.

17. [SONG] Button:

Switch to Song mode.

18. [LESSON] Button:

Enter Lesson mode of the current song and switch lessons.

19. [SPEAKER MODE] Button:

Switch Speaker modes.

20. [SUSTAIN] Button:

Activate or deactivate the Sustain effect.

21. [LAYER] Button:

Press once to activate the Layer function.

[SPLIT] Button:

Press twice to activate the Split function.

22. [TRANSPOSE] Button:

Press and use the [<]/[>] buttons to shift the pitch down or up by semitones.

23. [OCTAVE] Button:

Press and use the [<]/[>] buttons to shift the pitch down or up by octaves.

24. [CONTENT SELECT] Buttons:

Quickly select the desired sound, style, or song. [NUMBER INPUT] Buttons:

Use in combination with the [NUMBER] button to input the number of a specific sound, style, or song.

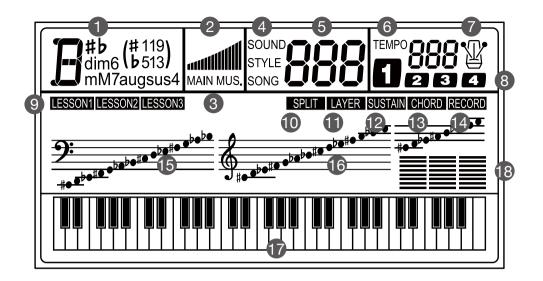

25. [<]/[>] Buttons:

Switch between sounds, styles, or songs, or to adjust function parameters.

26. LCD Display:

Provides real-time information.

Interface

1. [USB TO HOST]

Use this jack to connect the instrument to a PC or a mobile device using a USB cable (additional converter may be required). This allows for the transmission of MIDI and audio data between the instrument and the connected device.

2. [SUSTAIN] Pedal

Use this jack to connect a standard sustain pedal (sold separately).

3. [PHONES]

Use this jack to connect standard stereo headphones for private listening. When headphones are connected, the instrument's speakers will be muted.

Note!

Avoid using headphones at high volume for extended periods to prevent ear fatigue or potential hearing damage.

4. [DC-IN]

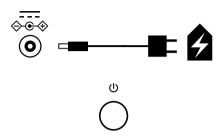

Use this jack to connect the provided 12V power adapter to supply power to the instrument.

Power Supply

This instrument can be powered using either the provided adapter or by 6 pieces of AA (NO.5) batteries (or equivalent alkaline batteries). Follow the instructions below for each power option.

Using the Power Adapter

- 1. Before connecting the adapter and powering on, lower the volume of all connected devices.
- 2. Connect the adapter to the [DC-IN] jack on the rear interface.
- 3. Plug the other end of the adapter into an AC outlet, such as a wall jack.
- 4. Press the [POWER] button. The LCD screen will illuminate, indicating that the instrument is powered on.
- 5. To power off the instrument, press and hold the [POWER] button for about half a second and then release it.

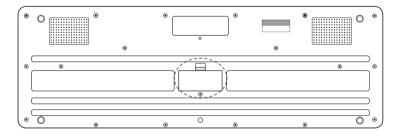

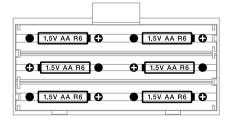

Note!

- 1. This instrument has an Auto Power-Off feature that turns off the unit after 30 minutes of standby time to conserve energy. You can customize the standby time or disable this feature. Please refer to the Function Settings section for more details.
- Only use the standard adapter provided with the product to avoid any damage to the instrument or potential safety hazards. Disconnect from the AC outlet during thunderstorms or when the instrument is not in active use.

Using Batteries

- Open the battery compartment located at the bottom center of the instrument.
- Insert 6 pieces of AA (NO.5) batteries, ensuring correct alignment with the polarity markings.
- 3. Close the compartment securely to ensure proper battery contact.

Note!

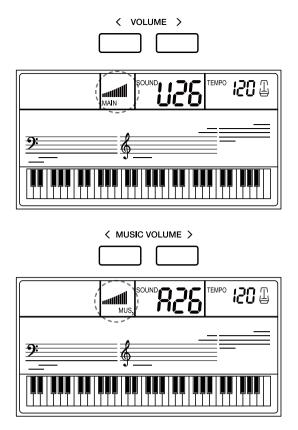

- 1. Do not mix used and new batteries.
- 2. Always use the same type of batteries.
- 3. Remove the batteries when the instrument is not in active use to prevent power drain.

Adjusting Volume

After powering on the instrument, you can adjust the volume settings to achieve the desired sound levels. Follow these steps:

- Use the [VOLUME </>] buttons to adjust the main (overall) volume of the instrument. The screen will display the "MAIN" volume meter as you make the adjustment.
- 2. Use the [MUSIC VOLUME </>] buttons to adjust the volume of all music content, including styles, songs, and the metronome. The screen will display the "MUSIC" volume meter as you make the adjustment.

Tip:	Keep in mind that if the main volume is set low, all sounds will be quiet regardless of the music volume setting. Adjust the balance between the volumes to achieve the desired sound balance.
Note!	If the instrument produces no sound, check if the main volume is set too low or if the [PHONES] jack is occupied.

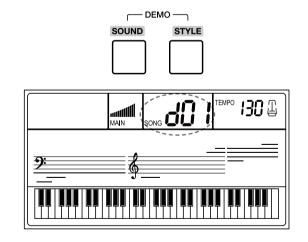

Listening to the Demo Song

This instrument features a built-in demo song that showcases its sound quality.

- 1. Press the [STYLE] and [SOUND] buttons simultaneously to enter Demo mode. The screen will display "Song d01", and the demo song will start playing after a 1-bar countdown.
- 2. During playback, press the [▶/■] button or press both the [SOUND] and [STYLE] buttons again to immediately stop and exit Demo mode.

Tip: While In Demo mode, most panel functions will be disabled.

Playing Various Instrument Sounds (Sound Mode)

This instrument provides access to a wide range of realistic sounds across different categories, including Chinese traditional instruments and percussions (refer to the Sound List for more details). Whether you're a beginner or an experienced player, you will also find several functions and features to enhance your playing experience with these sounds.

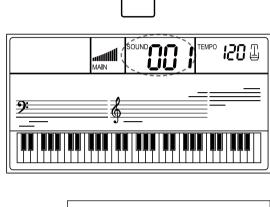

Selecting and Playing a Sound

To select and play a sound, follow these steps:

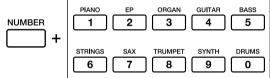

- 1. Press the [SOUND] button to enter Sound mode. The "SOUND" indicator will light up on the screen, and the current sound number will be displayed.
- 2. Press one of the ICONTENT SELECTI buttons to choose the desired sound. You can use the [<]/[>] buttons to switch to the previous or next sound in the entire list.
- 3. Alternatively, hold the [NUMBER] button and use the [CON-TENT SELECT| buttons as numeric inputs to directly select a specific sound by its number.
- 4. Once you have selected a sound, you are ready to play.

Note!

When entering a sound number, make sure to input the numbers within a 4-second interval for accurate selection.

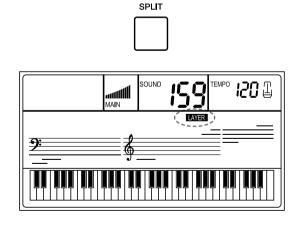

SOUND

Playing Two Sounds Simultaneously (Layer)

The Layer function allows you to play two different sounds simultaneously, creating a rich and layered tone. By default, the instrument has one sound layer, which is "R1" (Right 1). However, with the Layer function activated, you can add another sound layer, "R2" (Right 2), on top of "R1".

- 1. Press the [LAYER] button once to activate the Layer function. The "LAYER" indicator will light up on the screen.
- 2. Press the [SOUND] button repeatedly to toggle between displaying the sound numbers for "R1" and "R2".
- 3. Use the [CONTENT SELECT] buttons, [<]/[>) buttons, or the combination of [NUMBER] and [CONTENT SELECT] buttons to choose desired sounds for "R1" and "R2".
- 4. Once you have selected the sounds, play the keyboard, and you will hear both sounds playing simultaneously, as if two instruments are playing the same notes.
- 5. To deactivate the Layer function, press the [LAYER] button twice.

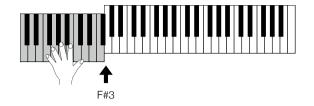

LAYER

Playing Different Sounds with Each Hand (Split)

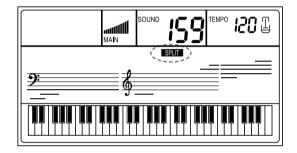

The Split function divides the keyboard into two independent areas, allowing you to play different sounds with each hand. When the Split function is activated, the left-hand side of the keyboard plays the assigned sound for the "L" (Left) layer.

The split point, which is set to F#3 by default, determines the point where the keyboard splits. Refer to the Function Settings section on how to change the split point's location.

- 1. Press the [SPLIT] button twice (or once if you already have the Layer function activated) to activate the Split function. The "SPLIT" indicator will light up on screen.
- 2. Press the [SOUND] button repeatedly to toggle between displaying the sound numbers for "R1" and "L".
- 3. Use the [CONTENT SELECT] buttons, [<]/[>) buttons, or the combination of [NUMBER] and [CONTENT SELECT] buttons to choose desired sounds for "R1" and "L".
- 4. Once you have selected the sounds, play the keyboard, and you will hear different sounds from the left and righthand side of the keyboard, as if two instruments are playing different notes.
- 5. To deactivate the Split function, press the [SPLIT] button once more.

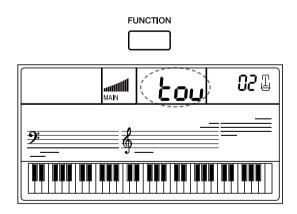

Touch Response

Touch Response adds expressiveness by matching volume and tone to your playing speed and force. It's enabled by default.

To adjust it, press and hold the [FUNCTION] button, then press the B6 key. With [FUNCTION] held, use [<]/[>) buttons to set the level. For details, please refer to the Function Settings section.

Sustain Effect

The Sustain effect adds a certain sustain to all notes played after they are released.

To enable or disable the effect, simply press the [SUSTAIN] button.

Tip:

For more precise and natural sustain control, you can connect a standard sustain pedal (sold separately) to the [SUSTAIN] pedal jack.

Transpose

With the Transpose function, you can shift the pitch of the entire keyboard in semitones, allowing you to play in different keys without changing your finger placement. This instrument supports ± 12 semitones range for transposing.

Here is how to use the Transpose function:

- 1. Press the [TRANSPOSE] button to display the current transpose value on screen.
- 2. Use the [<]/[>] buttons to adjust the value. Each press of the button will shift the pitch by one semitone.
- 3. To reset the value to "00", press both [<] and [>] buttons simultaneously.

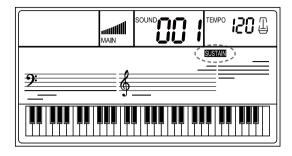

Octave

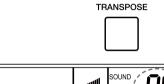

The Octave function allows you to shift the pitch of the keyboard up or down by an octave, providing a wider tonal range for your performance.

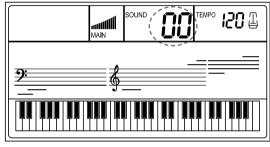

To use the Octave function:

- Press the [OCTAVE] button to display the current octave value on screen.
- 2. Use the [<]/[>] buttons to adjust the value. Each press of the button will shift the pitch by one octave.
- 3. To reset the value to "00", press both [<] and [>] buttons simultaneously.

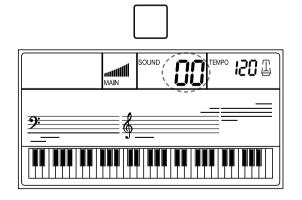

OCTAVE

Tip:	You can apply different octave settings to R1, R2, and L.
Note!	Certain sounds may sound unusual at the maximum transpose level ("+12" / "-12") or while using octave function, since their range has been significantly increased or decreased beyond the range of their corresponding instruments.

Playing Auto-Accompaniment (Style Mode)

In Style mode, this instrument allows you to play chords with your left-hand while being accompanied by an entire band or orchestra. With a wide range of auto-accompaniments available in various styles (refer to the Style List for details), you can enjoy the experience of playing as a one-man band ensemble.

Playing the Percussion Part of Accompaniment

- Press the [STYLE] button to enter Style mode, the "STYLE" indicator will light up on screen, and the current style number will be displayed.
- 2. Use the [CONTENT SELECT] buttons to directly choose the first style of the desired category. You can use the [<]/[>] buttons to switch to the previous or next sound in the entire list.
- Alternatively, hold the [NUMBER] button and use the [CON-TENT SELECT] buttons as numeric inputs to directly select a specific style by its number.
- Press the [►/■] button to immediately start playing the percussion part of the current style. Press the button again to stop the accompaniment.
- 5. If you want the style to start simultaneously with your performance, press the [SYNC START] button to put the style in standby. Now, play the keyboard, and the percussion part of the style will start playing in sync with your performance.

Playing All Parts of Accompaniment

- 1. Press the [CHORD] button to activate Chord mode, the "CHORD" indicator will light up on screen. The instrument now recognizes chords played in the left-hand area.
- 2. Press the [SYNC START] button.
- 3. Play a chord in the left-hand area, and all parts of the selected style will start playing in sync. The accompaniment will automatically follow your chord changes, and the name of each chord you play will be displayed in real-time.

Tip:

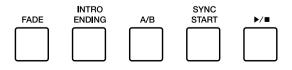

When the percussion part of a style is already playing, pressing a chord in the left-hand side will activate the full accompaniment as well.

STYLE

Playing Different Style Sections

To add variety and dynamics to your performance, this instrument offers various style sections to your disposal, including Intro, Ending, Main A, Main B, Fill-in A, and Fill-in B. Switching between these sections during performance allows you to shape the music according to your style and expression.

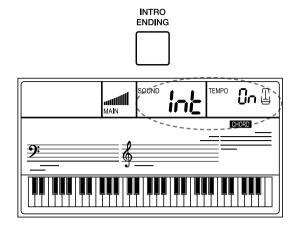

Intro/Ending Sections

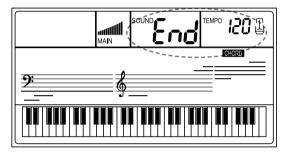

The Intro section sets the tone for the beginning of a song and serves as a transition to the pre-selected Main section. The Ending section provides a fitting conclusion, bringing the song to a close. The duration of the Intro and Ending sections varies depending on the chosen style.

- 1. Before playing a style, press the [INTRO/ENDING] button for the Intro section to stand by. The screen will briefly display "Int On".
- Enable Chord mode and Sync Start function, then play a chord in the left-hand area to immediately start the Intro. You can also start the percussion part of the Intro by pressing [▶/■].
- 3. Once the Intro concludes, the accompaniment will transition to either the Main A or Main B section.
- Press the [INTRO/ENDING] button again, and the screen will briefly display "End." This will begin the Ending section, and style accompaniment will automatically stop after the Ending section completes.

Tip:

If you press the [A/B] button during the Intro/Ending section, you will immediately transition (back) to the Main A/B section at the start of the next measure.

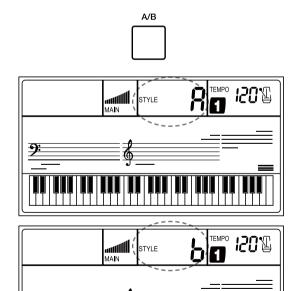

Main A/B Sections

Main A and B are the main accompaniment sections of a style. Switching between main sections during a performance adds dynamic and engagement to the music.

- Before playing a style, press the [A/B] button to preselect either the Main A or Main B as the section to play when the style begins or when Intro section concludes.
- 2. While a style is playing, press the [A/B] button to switch between the Main A and Main B sections. Upon switching to the other main section, the screen will briefly display the name of the new section as either "A" or "B."

Fill-in Sections

Fill-ins are short musical passages used for smooth transitions between sections or to add variation to the accompaniment.

- When Main A or Main B is playing, pressing the [A/B] button again will automatically add a Fill and subsequently switch to the other section.
- Additionally, if you hold down the [A/B] button, the Fill will loop continuously until the button is released, and the style will subsequently switch to the other main section.

Fade In/Fade Out

Fade In

Fade-in creates a gradual increase in volume when starting the accompaniment.

- 1. To start the accompaniment with Fade-in, press the [FADE] button before playing a style, and the screen will briefly display "FAd In" with the volume meter dropped to zero.
- Press the [►/■] button to start the accompaniment (or play in the left-hand area with both chord mode and sync start activated).
- 3. The instrument's volume will gradually increase from zero to the current set volume in 10 seconds.

Fade Out

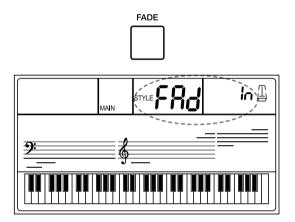

Fade-out creates a smooth decrease in volume until the accompaniment stops completely.

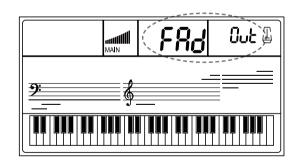

While the accompaniment is playing, press the [FADE] button, and the screen will briefly display "FAd Out". The instrument's volume will gradually decrease from the current set volume to zero in 10 seconds. The accompaniment will stop when the process is complete.

The default duration for fade-in and fade-out is 10 seconds. You can adjust this duration in the Function Settings.

To stop fading in or out, simply press the [FADE] button again. The fading will stop and the screen will briefly display "FAd OFF".

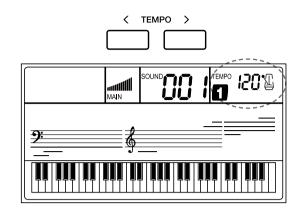

Adjusting Tempo

Each style in this instrument has a preset optimal tempo, but you can adjust the tempo as needed.

- 1. Use the [TEMPO </>] buttons to adjust the current tempo value. Pressing the [TEMPO <] button will decrease the tempo, while pressing the [TEMPO >] button will increase it.
- 2. To reset the tempo to the default value of the selected style, press the [TEMPO <] and [TEMPO >] buttons simultaneously.

Tip:

When a style is playing, switching to another style will not change the current tempo. However, when no style is playing, selecting a new style will set the tempo to the preset value of that particular style.

Chord Basics

This section provides a brief explanation of some basic chord knowledge. If you are already familiar with chords, feel free to skip this section.

Constructing Chords

A chord is a harmonious blend of three or more simultaneous notes, typically formed on the principle of thirds. The "triad" is the most prevalent chord in music, and the notes within it are named based on their position. The "root" is the lowest note, with the "third" and "fifth" being intervals above the root.

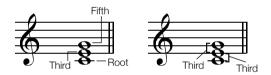

The root or tonic, defines the chord's "mode," thereby determining the composition of the other notes. The nomenclature of the chord depends on the intervals of each note from the root:

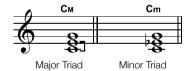

- Major and minor triads: When the root is a perfect fifth from the fifth note and a major or minor third from the third note.
- Augmented and diminished triads: When the root is a major third and an augmented fifth or a minor triad and a diminished fifth from the third and fifth note respectively.

By stacking thirds, we can add a seventh and ninth on the triad to create chords like the "seventh," "ninth," "eleventh," and "thirteenth." More chord types can be found in chord charts or references.

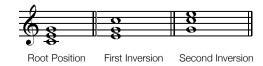

Chord Inversions and Naming

In an "inversion," the root note is moved up, placing the third or fifth note as the lowest.

Chord Names

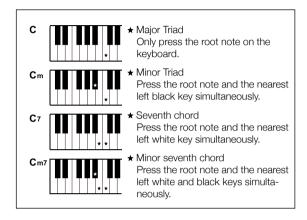

A chord name gives all necessary details about a chord, like the root, whether it's major or minor, augmented or diminished, or a seventh, ninth, etc. For instance, in the illustration below, the chord name indicates that the root note is C and the chord type is a minor triad, making it a C minor triad. Please refer to the chord chart for the names of other chord variations.

Chord Root Chord Type

Fingered Chord Technique

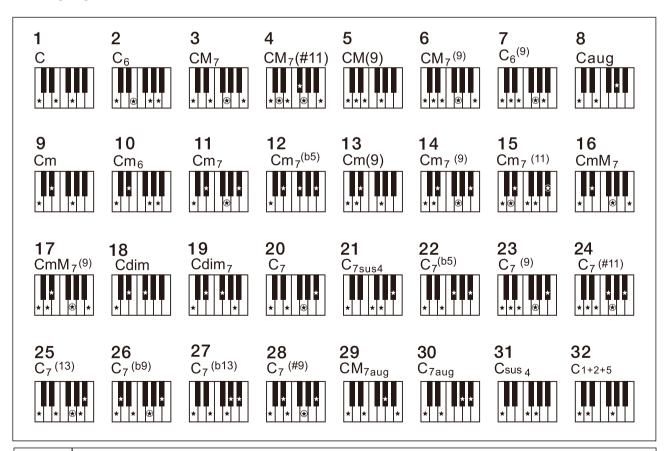

Using the fingered chord technique, you can play major, minor, dominant seventh, and minor seventh chords with less than three fingers. Refer to the illustration below for chords with root note C to understand the fingerings of chord variations.

This instrument supports a mixed chord detection (as the default Chord mode) for both single and multiple fingers, allowing fingered chords to be correctly detected.

Multi-finger Chord Technique

In multi-finger chord mode or when using the full keyboard chord detection mode, the instrument can only recognize complete chord fingerings.

Note!

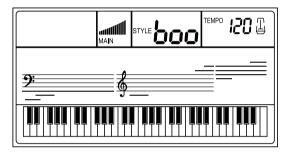

In the above chart, notes marked with "®" are optional, meaning that these notes can be played or not played, and the chord will still be detected.

Speaker Mode

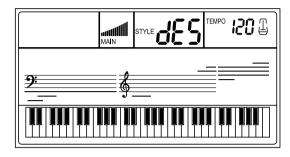

This keyboard includes a Speaker Mode feature that enhances performing and listening experiences through different EQ presets.

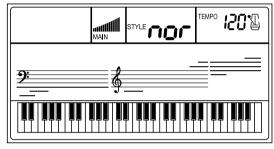

There are three Speaker modes available: Boost mode, Desktop mode, and Normal mode. To switch between them, simply press the [SPEAKER MODE] button. The screen will briefly display the currently selected mode.

Speaker mode	LCD display
Boost	boo
Desktop	dES
Normal	חסר

Metronome

The built-in metronome can help you maintain a steady rhythm while practicing or recording.

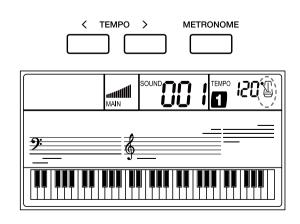

Using the Metronome

Press the [METRONOME] button to turn on the metronome. Press again to turn it off.

To slow down or speed up the metronome sound, use the [TEM-PO </>] buttons to adjust the tempo.

Metronome settings

The metronome on this instrument can be customized to indicate different time signatures. For specific settings, please refer to the Function Settings section.

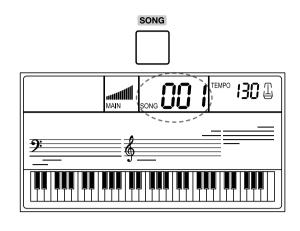

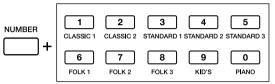

Listening and Learning Songs

The instrument comes preloaded with a variety of songs in different genres (see the Song List for details) for you to listen and learn.

Listening to Songs

- Press the [SONG] button to enter Song mode. The "SONG" indicator will light up on the screen, and the current song number will be displayed.
- 2. Use the [CONTENT SELECT] buttons, [<]/[>] buttons, or the combination of [NUMBER] and [CONTENT SELECT] buttons to choose the desired song.
- Press the [►/■] button to start or stop playing the selected song immediately.
- 4. Use the [TEMPO </>] buttons to adjust the tempo of the song.
- 5. To exit Song mode, press the [SOUND] or [STYLE] button when no song is playing.

Learning and Practicing Songs

Each song on this instrument includes 3 Lessons designed to help you practice and improve.

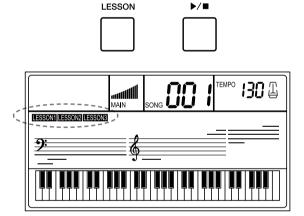

- 1. In Song mode, press the [LESSON] button to enter the Lesson mode for the currently selected song.
- 2. You will start with the first practice, which is the right-hand practice of LESSON 1. Press the [▶/■] button to start the lesson, and the screen will display the notes you need to play. To stop the lesson, simply press the [▶/■] button again.
- 3. Repeatedly press the [LESSON] button to cycle through all nine practices. These consist of Left-hand, Right-hand, and Bothhands practices for Lessons 1, 2, and 3.

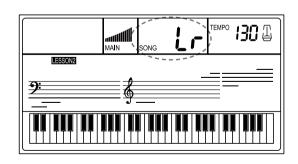

Three Lessons and the Grading System

- Lesson 1: Practice the correct timing.
- Lesson 2: Practice the correct notes. The lesson pauses until you play the correct note(s) displayed on the screen.
- Lesson 3: Practice correct notes and timing.

After completing a lesson, the instrument will play a grading voice message. Following this, the selected lesson will automatically restart, allowing for continuous practice.

Level 1: OkLevel 3: Very GoodLevel 4: Excellent

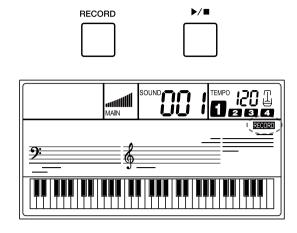

Recording and Playback

The recording and playback feature of this instrument allows you to record your performance and play it back for review or sharing.

Recording Performance

- Press the [RECORD] button to activate the recording function.
 The "RECORD" indicator will light up on the screen, and the beat counter will flash, showing that the instrument is ready for recording.
- 2. Play the keyboard, use Sync Start and Chord mode if desired, or press the [▶/■] button to start the recording process.
- 3. Press the [RECORD] button again to immediately stop the recording and save it on this instrument. The screen will briefly display "OFF" and the "RECORD" indicator will turn off.

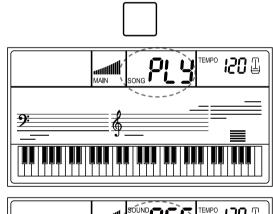

Playing Back Performance

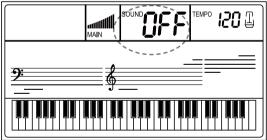

- To listen to your recorded performance, press and hold the [PLAY] button. The screen will briefly display "PLY" to indicate that playback has started.
- Press and hold the [PLAY] button again to stop playback. The screen will briefly display "OFF", indicating that the playback has ended.

Note!

This instrument has a single recording capacity, meaning that each new recording will overwrite the previous one. Additionally, the recorded content will be erased whenever the instrument is powered off.

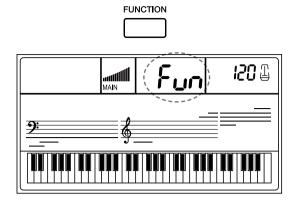

PLAY.

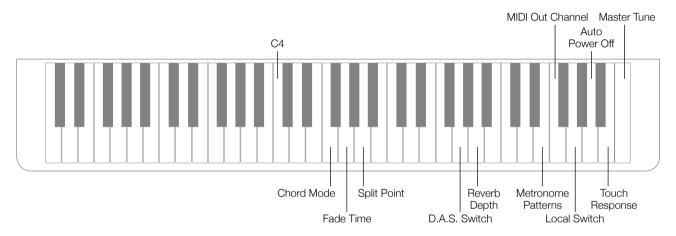

Function Settings

You can access and adjust various functions of this instrument to suit your preferences. Here is how you can navigate and modify the settings:

- 1. Press and hold the [FUNCTION] button and press the specified keys (as indicated in the chart below) to access the corresponding function's settings.
- 2. Use the [<]/[>] buttons to change the parameter or option. To reset the parameter or option to default, press both [<] and [>] buttons simultaneously.
- 3. Once you have adjusted the desired settings, release the [Function] button to save the changes and exit the Function mode.

Function Settings Key Map

Function Settings List

Key		Display	Range/Options	Default	Description
C7	Tune	Eun	-50 ~ +50	00	Adjust the overall pitch of the instrument in 2-cent increments.
В6	Touch Response	tou	00, 01 ~ 03	02	Switch between the keyboard's 4 built-in touch-response levels. "00" is off, while "01", "02", and "03" are Soft, Normal, and Strong.
A6	Auto Power Off	PoF	OFF, 30, 60	30 minutes	Set the automatic power-off time in minutes.
G6	Local Switch	Loc	ON, OFF	ON	When set to "On", the device operates as a standalone instrument. When set to "Off", the instrument operates as a MIDI controller capable of outputting MIDI information.

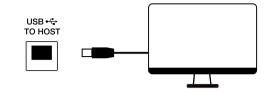

F6	MIDI Out Channel	[H	01 ~ 16	01	Set the channel used for outputting MIDI information to external devices via USB connection.
E6	Metronome Patterns	bEE	00, 02 ~ 16	00	Set the number of beats per bar/measure for the Metronome sound. When set to "00", there is no accent bell. For non-zero values, the accent bell rings on every first beat.
A5	Reverb Depth	-Eb	00 ~ 10	04	Adjust the depth of reverb. Higher values create stronger sense of space.
G5	D.A.S. Switch	a85	ON, OFF	ON	Turn on or off the Dynamic Acoustic System feature, which is a volume-dependent sound quality optimization for human hearing that always provides the best possible master output. Turn this off if you prefer unfiltered sound.
A4	Split Point	SPL	01 ~ 61	19 (F#3)	Set/adjust the location of the split point for Split function and Chord mode. You can also press a key to directly set it as the new Split Point.
G4	Fade Time	FAd	01 ~ 20	10 seconds	Adjust the duration of fade-in and fade-out effects.
F4	Chord Mode	[rd	Fin, FuL	Fin	Set the Chord Mode that will be activated upon pressing the [CHORD] switch.

USB Function

The instrument's USB-B interface allows it to connect to a computer for MIDI and audio data transfer.

USB-MIDI: Connect the instrument to a computer's USB port using a USB cable. Most computers will automatically recognize the instrument for MIDI information transmission.

USB-Audio: Once connected, you also have the option to set the instrument's speakers as the audio output device for your computer.

Note!

Ensure to wake the computer from sleep/standby mode before connecting the USB cable. Always connect the USB cable before powering on the instrument.

MIDI Basics

MIDI (Musical Instrument Digital Interface) allows various electronic musical instruments, computers, and other devices to connect and communicate. MIDI carries event messages such as notation, pitch, velocity, volume control signals, vibrato, audio panning, and program change information.

MIDI information can be classified into two main groups: channel information, which pertains to individual MIDI channels, and system information, which includes broader control and synchronization functions.

This instrument can output real-time information via MIDI to control external MIDI devices. It also accepts incoming MIDI messages to generate sound accordingly.

Troubleshooting

Issues	Possible Cause and Solution
Slight noise when turning the power on or off	This is normal and not a cause for concern.
No sound from speakers during play or playback	 Check if the main volume or music volume is set too low. Remove handphones, audio cables, or adapters from the headphone jack.
Instrument produces noise	Put mobile phones further away from the instrument, as they may cause interference when in use or receiving calls nearby.
Auto-accompaniment not starting when sync start is enabled and keys are pressed	Ensure that you press keys in the chord area (left-hand side) to activate auto-accompaniment with Sync Start function on.
Incorrect pitch	 Reset the Transpose, Octave, and the Master Tune parameters to "00". If the issue persists, try restoring the instrument to factory settings by turning it off, holding both [<] and [>], and pressing the [POWER] button.
Computer not recognizing the instrument when connected	This instrument does not require additional drivers. If the computer does not recognize it: 1. Ensure the USB cable is securely connected. 2. Try connecting to another USB port on the computer.
Pedal (sold separately) not responding	Verify that the pedal cable is properly connected.
Instrument powers off automatically	Go to the auto power-off setting and disable it if not needed.

Specifications

IX as the a great	Model	61 Piano Shaped Touch Sensitive Keys (PSTK)
Keyboard	Touch Response	3 Types, Off
Display	Backlit LCD	
Language	English	
	Polyphony	32
	Sound	450 Presets
Sounds	Keyboard Part	L (Left), R1 (Right 1), R2 (Right 2)
Sourius	Layer	Yes
	Split	Yes
	Split Point	Yes
	Style	150 Presets
Styles	Style Control	START/STOP, INTRO/ENDING, A/B (A/B FILL), SYNC START, FADE IN/OUT, CHORD, MUSIC VOLUME
	Chord	32 Types
	D.A.S.	Yes
Effects	Reverb	Yes, 0 ~ 10
	Speaker Mode	Normal mode, Desktop mode, Boost mode
	Song	120 Presets (Lesson mode supported)
Songs & Recording	Recording Capacity	1 user song
	Demo Song	1
Ditale Obits	Transpose	-12 ~ +12
Pitch Shift Functions	Octave	-2 ~ +2
1 diletions	Tune	-50 ~ +50
Other	Metronome Patterns	0, 2 ~ 16
Functions	Tempo	5 ~ 320
	USB TO HOST	USB-B x 1
Connectivity	PHONES	3.5 mm stereo output × 1
	SUSTAIN	6.5 mm sustain pedal input × 1
Dower Hoose	Power Supply	DC 12 V/500 mA or AA size batteries × 6
Power Usage	Auto Power Off	30 min/60 min/Never
Sound System	Amplifier Output	2.5 W × 2
	Speaker Output	5 W × 2
	Speaker Size	12 cm × 2
Size/Weight	Dimensions LWH	916 × 305 × 92 mm
	Weight	3.5 kg
