Accessories	USB Type-C cable Quick Start Guide Precautions for Use Warranty (for some regions)

PRODUCT FEATURES

Transport section and Focus Control

SLAB's transport section includes essential functions, such as play, record, and seek, and a multifunctional dial that enables faster browsing and seeking. One of the dial's key features is Focus Control, which you can use to manipulate third-party plugins, such as virtual instruments and effects.

OLED display and touch-sensitive encoders

Watch the OLED display for real-time information on integration status and parameter values in exceptional clarity. Use the 4 touch-sensitive encoders to the side for direct access to EQs, stems, effects, and parameter controls in Serato Studio.

Multicolor LED pads

SLAB captures every nuance of expression in your performance. Its 16 Performance Pads are highly sensitive, responsive, and tactile, and they feature velocity and aftertouch support.

Stems Level

When you use SLAB with compatible Serato software, including Studio, Sample, and DJ Pro, you can use the Stems Level feature to finely tune the volume of individual parts in the same track, such as vocals, melody, drums, and bass.

Seamless integration with Serato applications

Thanks to its versatile MIDI mode, you can use SLAB with Serato Studio while taking advantage of Serato Sample's high-quality sampling engine (license needed). And if you pair SLAB with Serato DJ Pro, it serves as an Official Serato Accessory (OSA), expanding the possibilities of your DJ sets.

Sleek design

SLAB features a compact body smaller than A4/US Letter size, making it easy to carry anywhere and create a comfortable studio environment, whether you're at home, in a café, or on the go.
